## Beecardia

**Beecardia mission** is to save lives by bringing cloud based cardiology services to every family. By contrast to most healthcare innovations, Beecardia solutions are focused on emerging markets and affordable for 71% of world population with daily income below \$10.

The company develops **Beecardia Mobile Health and Cloud Platform for Cardiology and Pulmonology**. The platform consists of very affordable professional quality 3-12 lead ECG sensors, electronic stethoscope, spirometer and other life signs monitoring devices that, along with mobile, desktop and cloud software allow to record, upload and interpret patient signals.

### Key features of our platform:

- Any doctor can provide telemedicine services to a wide market
- Optimized doctor workflow increases revenues while keeping the costs low
- Accessible anywhere, anytime and at any budget - via web browsers and mobile devices

Beecardia is intended for both early diagnostics and chronic patients monitoring, enabling medical services in remote locations, homecare for aging population, long term holter recording, tele monitoring in ambulances, asthma and COPD continuum of care support.

### **Background:**

Easy Line, established in 2001, is a privately owned company that has developed a line of Enteral nutrition formulas and nutraceuticals for a variety of patients. Easy Line is a leading company in the field of medical food, liquid and powder formulations in Israel.

Our products are manufactured in Israel while utilizing the highest standards of quality and packaging in accordance with internationally recognized standards by ISO 9001:2000, Haccp, GMP and KOSHER certificates. The products are been manufacture in UHT technology.

Easy Line has revolutionized the nutritional supplement and nutraceuticals market in Israel with its determination, dedication and principles, and strives to find innovative solutions in the field of nutrition for global international markets.

### **About the products:**

Our supplements are key in meeting nutritional requirements of people or patients who are recovering from illness or surgery, are at nutritional risk, lactose-free diet, suffer from involuntary weight loss or require modified diets

These formulas are designed for tube feeding and oral supplementation- can replace a complete balanced meal.

Our clients include doctors, dieticians, pharmacies, hospitals, and homes for the aged etc.

The products are suitable for people at home who need to enrich their food (Oncology patients etc.).

These formulas are also suitable for healthy people who needed a very concentrate food such as soldiers that need to consume approximately 4000 Kcal/day.

In case of natural disasters – when food is not available these formulas can be a source of complete packed meal.

In addition, we have a very unique formula, which is based on soy protein.

### **Advantages:**

The uniqueness of Easy Line is that the company can manufacture by customer demand – "Custom made".

We can manufacture under any application the customer's needs, different flavors, different texture, different vitamins etc.

## Flight Medical

Established in 1996, Flight Medical is a part of publicly traded Ilex group (TLV:ILX). Flight Medical is vertically integrated medical device company specializes in the development, manufacturing and marketing of high-end versatile ventilators.

For the last 20 years Flight Medical acquired unique experience in mechanical ventilation working with customers all over the world. Well-known portable ventilator HT50\* sold and supported by Newport (Covidien/Medtronic) was developed and manufactured using Flight Medical technology.

Flight Medical operates in 40 countries and won its reputation as truly reliable **partner in ventilation**.

New generation of Flight Medical ventilators Flight 60 (F60) - state of the art ventilators provides ICU quality affordable ventilation whenever is needed.

In recent years over 20,000 ventilators were deployed worldwide for use in critical care, home care, long term care, emergency transport. Flight Medical ventilators won their reputation as reliable, easy to use, functionality rich and highly affordable ventilators.

The Flight60 (F60) series is the most versatile autonomous ventilator in the market. One ventilator meets multiple ventilation needs. It is used in **ICU, Step down units, Emergency Room (ER), Transport environment (ambulance, helicopters, airplane, etc. FAA approved)**, Homecare and Long term institutes (Nursing homes).

The F60 unique features and high-end specifications, together with its compact size enable high transportability and ventilating majority of patients.

The cost of ownership provides a real competitive advantage.

## PerSys Medical

### Company at a Glance:

**PerSys Medical Group** is a global organization which manufactures, markets and distributes innovative lifesaving medical devices for Military, EMS's, Law Enforcement, Disaster Preparedness, Search and Rescue, pre-hospital and in-hospital use.

Among our brands:

- The Emergency Bandage
- Blizzard thermal protection
- B.I.G. - Bone Injection Gun
- NIO – New Intraosseous device

### Technologies/ Products/ Services

**The Emergency Bandage – (AKA the Israeli Bandage®)** All-in-one bandage, consolidates multiple first-aid devices: a primary dressing, pressure applicator, secondary dressing and a foolproof closure bar to secure the bandage in place. The bandage is easy to use, appears in several sizes and different colors, used by militaries and civilian arenas worldwide.

**The B.I.G. Bone Injection Gun & the NIO New Intra Osseous device** - used by military and civilian healthcare systems worldwide. These are small, light, and easy to use, automatic intra-osseous devices which allow quick and safe access to the patient's vascular system within 10 seconds for fluid and drug administration.

**Blizzard's** unique Reflexcell™ technology provides thermal protection, maximum warmth, reduces symptoms of shock, and guards against the risk of hypothermia and its associated complications. Supports Hypothermic patient treatment and increases survival rates in extreme conditions.

### **Q Core Medical– Advancing medication infusion delivery**

Q Core Medical is an innovation leader in infusion delivery systems for hospital and homecare environments. We are totally focused on developing, manufacturing, marketing and selling advanced volumetric infusion pump systems that provide maximum drug delivery safety and ease of use for patients and medical staff. Our innovative infusion pump systems help improve patient safety while reducing the complexity and costs of infusion pump systems management.

Q Core products are differentiated by their small size and weight, outstanding performance, high safety and accuracy, and unprecedented low total cost of ownership throughout the pump system life cycle. Additionally, Q Core infusion pumps are unique in their software-based control, use of a full-color touch screen and user-friendly interface.

Our flagship product is the Sapphire Multi-therapy Volumetric Infusion Pump. Offering all the advantages of the Q Core platform, Sapphire has been proven to be highly reliable and durable, with long mean time between failures (MTBF). The Sapphire family also includes dedicated infusion pumps and sets.

A privately owned company, Q Core Medical is led by experienced managers who have been instrumental in numerous proven commercial successes, providing a firm foundation for continued innovation and longevity. We continually invest in R&D, and have a strong development pipeline, ensuring Q Core's place at the cutting edge of medical infusion delivery technology.

Q Core has a fast-growing worldwide sales and distribution network, with professional representation in all major markets.

## **INTRAOPERATIVE NEUROPHYSIOLOGICAL MONITORING**

Neuromonitoring has steadily become standard-of-care for an increasing number of Neurosurgical and orthopedic procedures. In many cases the availability of experienced and dedicated monitoring staff is lacking. Surgical Monitoring Services (“SMS”) is a unique group of neurophysiologists capable of high-level neurophysiological monitoring during surgical procedures.

SMS is a highly-specialized service-based company focused on providing reliable neuromonitoring with seasoned neurophysiologists harboring advanced neuroscientific backgrounds. The staff arrives upon request with all the necessary equipment to provide several modalities in order to safeguard the patient and deliver neurophysiological mapping throughout the procedure.

## **SURGICAL MONITORING SERVICES – EUROPE (“SMS”)**

**SIMPLY PUT, WHEN SURGERY IS COMPLEX AND INVOLVES INHERENT NEUROLOGICAL RISKS, YOU WANT SMS IN THE OPERATING ROOM WITH YOU.**

### **ADVANTAGES IN USING AN EXTERNAL IOM SERVICE:**

- Experienced neurophysiologists
- Excellent response time and client satisfaction
- Successful business model in several countries
- Alleviates the need to purchase costly monitoring equipment (monitoring system and software, disposable electrodes)
- Advanced and adaptable capabilities with constant internal and external education and accumulated experience
- Alleviates the need to train and maintain in-house staff

### **MODALITIES FOR MONITORING AND BRAIN MAPPING**

- Somatosensory Evoked Potentials (SSEP)
- Motor Evoked Potentials (MEP) - transcranial electric and D wave
- Electrocorticography (ECOG)
- Cortical and subcortical mapping
- Visual Evoked Potentials (VEP)
- Auditory Evoked Potentials (BERA)

**All these combined ("multi-modality neurophysiological monitoring") can provide an accurate and robust neurophysiological picture at any given time during the procedure.**

## Circ MedTech Ltd.

Male Circumcision is one of worlds the most common medical procedures, 1 in 3 males are circumcised. In India there are about 2.5M procedures every year.

Circ MedTech Ltd. is offering innovative and affordable public healthcare solutions. We have developed **PrePex™**- The world's only Non-Surgical male circumcision device which is safe, simple and cost effective.

The **PrePex™** device facilitates circumcision by creating controlled radial pressure that stops blood flow to the foreskin, inducing a controlled closed ischemic process. The patented device is disposable and intended for single use. The procedure entails no injected anesthesia, no bleeding, no sutures and can be conducted by trained healthcare professionals, from low cadre nurses to doctors.

The **PrePex™** infant and Child Circumcision device is designed to enable safe and effective circumcision of male ages 0 days to 12 years. It is a single-use device based on the existing PrePex technology and designed to be administered safely and simply by physicians and non- physicians alike.

The device will stay on the infant or child's foreskin until natural detachment in a few days. This process is similar to the detachment of an umbilical cord after birth. During this time the infant's or child's daily activity will continue as regular.

We have already delivered more than 1M adult devices to customers in 14 countries in Africa and Asia for adolescents and adults. Our company has collaborated with governments, International developments agencies, NGOs and private sector.

PrePex™ is certified CE Mark Class IIa, FDA cleared (for 18+) and Pre-Qualified by WHO (for 13+) and the company is certified ISO 13485.

## Chaban Medical

Chaban Medical develops and manufactures quality, dependable medical equipment for home care and rehabilitation. The new Oxy-Tec 5 version oxygen concentrator has been specially developed to provide a dependable, convenient source of supplemental oxygen for therapeutic needs.

Suitable for both children and adults, Oxy-Tec 5S offers concentration up to 96% and flow rates reaching 5 LPM. Oxy-Tec 5S separates and concentrates oxygen from ambient room air for delivery to a patient requiring low flow oxygen therapy. Oxygen from the air is concentrated using a process of molecular sieves and a pressure alternating system.

Convenient and lightweight, Oxy-Tec 5S eliminates the need to drag around bulky, unmanageable oxygen cylinders and their refill cylinders.

Chaban Medical holds ISO 14001, ISO 13485, ISO9001, clean room ISO-7 certifications, and a business license 1.3 for medical development and manufacturing.

Chaban Medical is certified by the U.S. Food and Drug Administration (FDA) and holds the CE Marking of the European Union. The company has been inspected and certified by the Standards Institute of Israel (SII) and KEMA (Holland), as well as the FDA.

Chaban Medical provides superior engineering capability compliant with medical standards, affording customers a combination of proven, independent production.

Further, the company delivers the ability to upgrade, modify, and improve its products to meet customer requirements.
